

REMARKS

Applicants respectfully request entry of the new claims before examination of this case. Support for new Claims 42-66 is found in the specification as originally filed at least at page 4, line 21 to page 5 line 6, page 11, lines 5-6 and lines 10-20, page 13, lines 5-14, page 14, line 14 to page 15, line 21, page 16, line 19 to page 17, line 3, and page 20, lines 18-23. No new matter is added.

Claims 1-5 and 16-21 incorporate the limitation of a configuration server for performing a blasting process, and are therefore believed to be allowable over the cited references. Claims 6-15 and 22-35 incorporate the limitation of providing differentiated and targeted service control, and are therefore believed to be allowable over the cited references. Claims 36-41, which were previously objected to, have been rewritten in independent form to incorporate all the limitations of relevant base claims and intervening claims, and are therefore believed to be allowable. Claims 42-66 incorporate the limitation of an application server sending signaling information indicating a call handling function to a network interface, and are therefore believed to be allowable over the cited references.

CONCLUSION

Claims 1-66 are pending in the present Application. Reconsideration and allowance of these claims is respectfully requested.

If there are any questions, please telephone the undersigned at (408) 451-5907 to expedite prosecution of this case.

Respectfully submitted,

Customer No.: 24488

John M. Kubodera
